

STOKVIS 4FLEX

Compressible plate mounting tapes

EFFECTIVE SOLUTIONS TO YOUR FLEXOGRAPHIC PRINTING PROCESS!

Stokvis 4Flex compressible plate mounting tapes are designed to assure top flexographic printing results and to meet the most demanding individual printing needs in flexible packaging, label and corrugated cardboard industry.

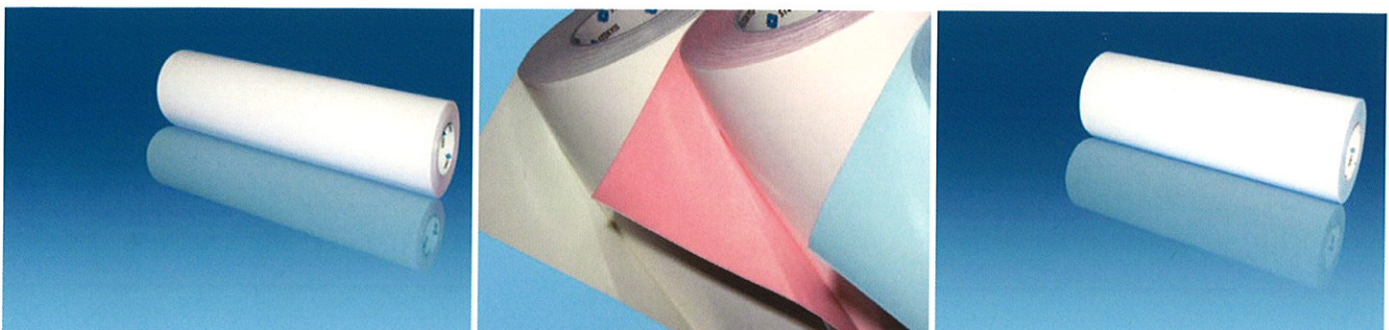

Stokvis 4FLEX for the most challenging printing jobs!

A broad products assortment

- A selection of different grades of tape compressibility for the desired print image
- A wide choice of adhesion levels on plate side
- Several tapes thicknesses

Top product features to meet the most demanding requirements in flexoprint

- Consistent tapes thickness
- Superior printing quality and perfect control of dot gain at high press speeds
- Effective compensation of printing machine vibrations
- Consistent ink distribution, fewer press adjustments and limited set up time
- Unique acrylic adhesive systems for secure mounting, easy repositioning and residue-free simple demounting
- Versatile medium hardness foam grade: for excellent print image in screen/solid and superior printing consistency over a large range of speeds and impression settings.
- Embossed PP release liner for excellent tape handling and the release of air bubbles

STOKVIS 4FLEX

Compressible plate mounting tapes

PRODUCT	THICKNESS mm	CARRIER	FOAM HARDNESS	TAPE COLOUR	ADHESION LEVEL PLATE SIDE	APPLICATION IDEAS
Stokvis 4Flex 224	0,400	PE foam with film reinforcement	soft	pink	medium	Process printing
Stokvis 4Flex 226	0,400	PE foam with film reinforcement	soft	pink	high	Process printing
Stokvis 4Flex 424	0,400	PE foam with film reinforcement	medium	white	medium	Combination printing
Stokvis 4Flex 426	0,400	PE foam with film reinforcement	medium	white	high	Combination printing
Stokvis 4Flex 426RW	0,400	PE foam with film reinforcement	medium	white	high	Combination printing when application requires to mount the plate first onto the tape
Stokvis 4Flex 624	0,400	PE foam with film reinforcement	hard	blue	medium	Solid printing
Stokvis 4Flex 232	0,550	PE foam with film reinforcement	soft	pink	low	Process printing
Stokvis 4Flex 234	0,550	PE foam with film reinforcement	soft	pink	medium	Process printing
Stokvis 4Flex 236	0,550	PE foam with film reinforcement	soft	pink	high	Process printing
Stokvis 4Flex 432	0,550	PE foam with film reinforcement	medium	white	low	Combination printing
Stokvis 4Flex 434	0,550	PE foam with film reinforcement	medium	white	medium	Combination printing
Stokvis 4Flex 436	0,550	PE foam with film reinforcement	medium	white	high	Combination printing
Stokvis 4Flex 436RW	0,550	PE foam with film reinforcement	medium	white	high	Combination printing when application requires to mount the plate first onto the tape
Stokvis 4Flex 438	0,550	PE foam with film reinforcement	medium	white	firm	Combination printing, ideal to reposition plates
Stokvis 4Flex 632	0,550	PE foam with film reinforcement	hard	blue	low	Solid printing
Stokvis 4Flex 634	0,550	PE foam with film reinforcement	hard	blue	medium	Solid printing
Stokvis 4Flex 636	0,550	PE foam with film reinforcement	hard	blue	high	Solid printing
Stokvis 4Flex 446	0,750	PE foam with film reinforcement	medium	white	medium	Combination printing on cardboard
Stokvis 4Flex 464	1,520	PE foam with film reinforcement	medium	white	medium	Combination printing on cardboard/corrugated board and when thin plate is used
